J. D. Goddard	A dissipative anisotropic fluid model for non-colloidal particle dispersions	1
S. Basak & S. Sarkar	Dynamics of a stratified shear layer with horizontal shear	19
Y. Wu & K. T. Christensen	Population trends of spanwise vortices in wall turbulence	55
J. Hoffman	Adaptive simulation of the subcritical flow past a sphere	77
M. L. Waite & P. Bartello	The transition from geostrophic to stratified turbulence	89
P. Marmottant, J. P. Raven, H. Gardeniers, J. G. Bomer & S. Hilgenfeldt	Microfluidics with ultrasound-driven bubbles	109
T. Ishikawa, M. P. Simmonds & T. J. Pedley	Hydrodynamic interaction of two swimming model micro-organisms	119
C. Pozrikidis	Flipping of an adherent blood platelet over a substrate	161
X. Lu & A. Prosperetti	Axial stability of Taylor bubbles	173
M. R. Flynn & P. F. Linden	Intrusive gravity currents	193
F. J. Higuera	Injection of bubbles in a quiescent inviscid liquid under a uniform electric field	203
L. Djenidi & B. Moghtaderi	Numerical investigation of laminar mixing in a coaxial microreactor	223
J. Szumbarski & J. M. Floryan	Transient disturbance growth in a corrugated channel	243
V. V. Voronovich, I. A. Sazonov & V. I. Shrira	On radiating solitons in a model of the internal wave–shear flow resonance	273
Y. Lee, D. J. Muraki & D. E. Alexander	A resonant instability of steady mountain waves	303
M. Brøns & A. V. Bisgaard	Bifurcation of vortex breakdown patterns in a circular cylinder with two rotating covers	329
E. Brown & G. Ahlers	Rotations and cessations of the large-scale circulation in turbulent Rayleigh–Bénard convection	351
A. I. Ruban, X. Wu & R. M. S. Pereira	Viscous–inviscid interaction in transonic Prandtl–Meyer flow	387
C. Py, E. de Langre & B. Moulia	A frequency lock-in mechanism in the interaction between wind and crop canopies	425
P.-O. Åsén & G. Kreiss	Resolvent bounds for pipe Poiseuille flow	451
